1D grids
$t_0 < \ldots < t_N$
(any grading)
tridiagonal A, L
$D_2 = A^{-1}L$
(Algorithm 1)
eigenvectors V
real spectrum
(Theorem 1)
tensor solve:
$V_x\,(\hat{F}/\Lambda)\,V_y^T$
matrix products
classical HWCM:
dense $N^2 \times N^2$ system, $O(N^6)$ work
this work:
$O(N^3)$ work in 2D, on any graded grid
